

Standardized kits for collection and transport of biological and medical samples: the “comprehensive” insurance of your sample transportation

Activity sector

- ✚ Biological and medical samples: infectious substances from human, animal or plant origin (maximum 50 ml or 50 g)

Safe Pack

- ✚ Primary corrugated card board packaging with the regulatory graphic symbol
- ✚ A secondary packaging as a watertight pot with a screw cap in which is placed a foam filling with dual function rack tubes and wedge with a highly effective absorbent-retentive.

This package comes in two versions and is suitable for the most frequently used tubes in the most common volumes:

- ✚ Pot model 625 ML : can contain up to 10 tubes from 5 to 7 ML or other type of first container
- ✚ Pot model 1 L : can contain up to 10 tubes from 7 to 10 ML or other type of first container

Safe Pack : main advantages

- ✚ Versatility : reusable parts of the SafePack
- ✚ Attractive price
- ✚ Possibility to buy separately the components of the kits
- ✚ Possibility to customize the packaging on condition that there is a minimum order quantity

SafePack is approved with its elements in order to keep to the protocol. The sender is required to use the SafePack following the instructions in accordance with the procedure. If the correct use is not respected, the sender will be held responsible for any damage, injury or accident. The designer, manufacturer or distributor cannot be held responsible for any damage if the use is not respected. The protocol requires the use of watertight primary container with the kits.
